WIRELESS HD STREAMING . STREAMY: THE UNIVERSAL NETWORK MEDIA PLAYER!

Mkv, h.264 compatible

One of the most important and useful features of streamy is its compatibility with all new generation audio and video format. you do not need any codec support to play video files like h.264, mkv, iso, ifo, mpeg, 1/2/4, sd/hd, divx and many other formats. with its hdmi out you can enjoy your hd videos with a resolution up to 1920*1080p.

Wireless sharing and torrent file download

Thanks to its wireless antenna you can share hard disc and sets contents with all connected pc and vice versa! you can watch on your tv all multimedia files you have on your pc hard disc or vice versa. streamy is able to download file torrent directly in your hard disc! (not included)

Nas function and samba server support

Thanks to those 2 functions you can use streamy as your network hard disc to share or store yr. files!

Web tv, youtube and more!

Streamy is a full hd network media player (wi fi and ethernet) so you can connect your pc to your tv by internet network. you will be able to watch web tv in streaming directly from your tv. what is more you can listen to web radio stations, watch youtube videos, play multimedia files stored in your pc or in your server upnp or in your usb devices. furthermore you can download on sata hd (not included) torrent files even when your pc is off.
